Installing

System Requirements

requires the following software to be already installed in your system:

- 1.3 or later.

Binary

- Download a [binary-distribution](#)
- Unzip
- Change to the -folder
- double click
- use (for more memory use `java -Xmx512m -jar launcher.jar`)

You can find DXF samples in the -folder.

Building

For building Kabeja you need [Ant](#) 1.6 (or later). For the build use the following steps:

- Download a [source-distribution](#)
- Unzip
- If you want to build the Cocoon-block, copy 'blocks.properties' to 'local.blocks.properties' and edit the path to the Cocoon-libraries.
- ant
